INSTRUCTIONS:

1. Hello my name is Cathryn Themann from In the Pink Designs. My project today is a Rectangle Gift Box using Artistically Inked stamp set, Artistic dies, Scalloped contours dies and Expressions in Ink Designer Series Paper. The Box measures 4 x 2 $\frac{3}{4}$ x 1 $\frac{1}{4}$ ". This is the perfect size box for small gifts, treats and/or a Gift Card.

2. I started with a piece of Pear Pizzazz Cardstock sized **8 1/2 x 7"**. I started with a pieces of **Pear Pizzazz Cardstock** sized **8 1/2 x 7"**.

I scored the 8 1/2" side at:

1/2, 3 1/4, 4 1/2 and 7 1/4".

I scored the 7" side at:

1 1/4, 5 1/4 and 6 1/2".

Below is a picture of what your Cardstock should look like after scoring, folding, cutting and rounding the corners of the flap with the **Detail Trio Punch**.

You can also watch my Video Tutorial where I explain each step in cutting and putting the box together.

I put the box together using Tear and Tape.

3. I attached 4 pieces of **Expressions in Ink Designer Series Paper** in sizes:

- (1) 3 3/4 x 2 1/2" for the top
- (2) 3 3/4 x 1" for the long sides
- (2) 2 1/2 x 1" for the short sides

I attached the DSP to the box with **Liquid Glue**.

4.

I cut a Scalloped Rectangle from **Basic White Cardstock** using the **Scalloped Contours dies**.

I stamped the sentiment, from **Artistically Inked stamp set**, onto the top-right corner with **Tuxedo Black Ink**.

I attached the Rectangle to the center of the top of the box with **Liquid Glue**.

I stamped the small flower image, from the same stamp set, with **Pale Papaya Ink** onto **Basic White Cardstock**. I cut it out with the **Artistic dies**.

I cut the leaves from **Pear Pizzazz Cardstock** using the **Artistic dies** also.

5.

I cut apart the leaves and placed them on the rectangle how I thought I would like them. I loosely put the flower on top and adjusted the leaves to exactly where I wanted them. Then I put **Dimensionals** on the back of the flower and pressed it down on top of the leaves to secure them both. If some of the leaves do not feel secure you can add a little **Liquid Glue** behind them.

For the final touch I added 3 Gold **Metallic Pearls** to the middle of the flower.
